

The RPI Roadster exhaust system is built completely from the highest grade 304 stainless steel with a polished finish.

As you can see here all tail pipe, silencer and CAT options are completely interchangeable with each other allowing you the options needed for your requirements.

Suitable for all Morgan Roadsters up to August 2007

Prices include VAT

All prices are correct at the time of printing.

100 Cell Sport CAT

These CAT pipes link the exhaust manifolds to the centre link pipe however have our 100 cell sports CAT's. They will fit directly in place of the original CAT pipe however, are correctly flowed and are also suitable to be used with our complete system.

Link Pipe

Made to link our CAT or De-CAT pipes directly to our 2 1/2" bore silencer.

18" Sports Silencer

2 1/4" straight through bore, with its oval construction no ground clearance is lost however sound absorption is still achieved.

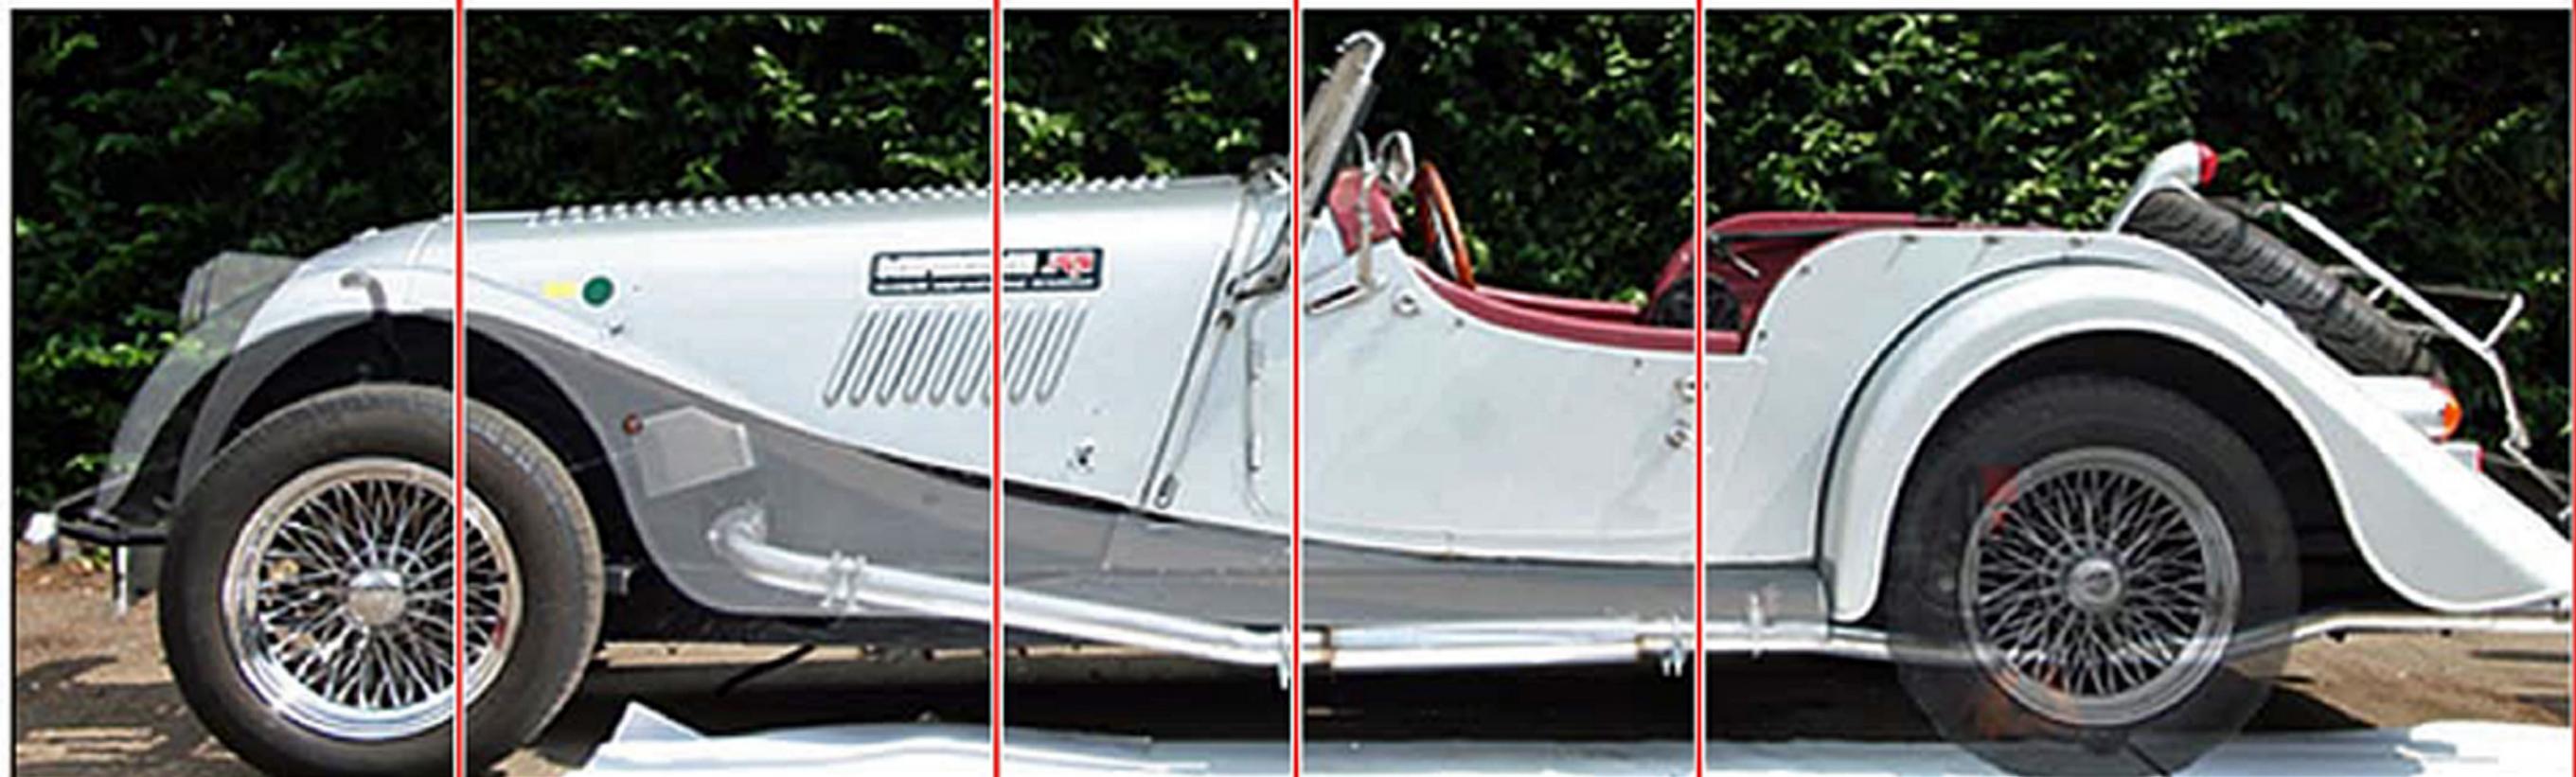

Roadster Tail Pipe

Specially designed for the Roadster, this silenced tail pipe also includes a reducer as needed for the 3.0 litre V6 engine for the best, all round road going sound.

Sports Tail Pipe

As used on the Morgan +8 this tail pipe is the thoroughbred version with no silencer or reducer.

Comprehensive Fitting Kit

Includes all the parts needed to install this system, exhaust clamps, hangers, olives, bushes, stainless steel bolts and Aero tight nuts.

De-CAT Pipes

These pipes link the exhaust manifolds to the centre link pipe without any CATs. Suitable for track days etc these pipes will fit directly in place of the standard CATs.

Trackday Silencer

Still 2 1/4 inch bore straight through as per our standard silencer however this silencer has more depth to it for added sound absorption. Sometimes required for the stricter tracks.

Side Exit Pipe

Designed originally for a customer that had a steep incline to his garage and was tired of his rear pipes catching the floor. This has to be the ultimate exhaust tip, bringing the noise forward to just before the rear wheel.

Tail pipe with Silencer

Exactly the same specification as the above sports pipe however this option has a silencer included to reduce the overall noise level.
